

# A perfect lawn all year round.

A grass for all seasons, Idealgrass is consistent in colour and texture. Its unique construction replicates the perfect lawn, without the work and costs of ongoing maintenance. It always looks beautiful and complements any garden.

- Allergy free
- No animal stains
- No fertilizing
- No watering
- No prickles
- No mowing
- No weeds
- 10 year warranty
- No grass stains
- No mud

**And it's 100% Drought Proof**

Idealgrass is easily laid on a range of existing surfaces including pavers, brickwork or concrete slab. However, correct base work preparation is essential when replacing tired lawn areas. Grass Solution's team can provide expert advice on the correct installation procedures to achieve a perfect result every time.

**idealgrass**<sup>TM</sup>

**“At last a synthetic grass green that performs like the real thing.”**

**Charlie Earp**

*PGS Supergreen* is a revolutionary Australian synthetic turf and underlay technology that provides tournament standard chipping and putting performance. *PGS Supergreen* is a premier all weather surface product which looks, feels and plays, like natural turf, without the associated levels of wear and maintenance.

#### **Accepts a golf shot**

- Receives chip and pitch shots just like a natural grass green. *PGS SUPERGREEN* has the ability to absorb energy and dissipate impact from the ball landing, allowing it to check up and run naturally on the surface.

#### **Plays like grass**

- On a *PGS SUPERGREEN* you can chip onto it, generate backspin to it, putt across it, speed it up or slow it down. In fact everything you can do with a golf ball on a natural green, you can do on a *PGS SUPERGREEN*.

#### **Looks like grass**

- The feel of the surface and run of the ball is similar to a top class natural grass green. Properly installed, the *PGS SUPERGREEN* complements surrounding landscaping.
- *PGS SUPERGREEN* accepts golf shoe spikes and provides a comfortable natural stance for the golfer.

#### **Shade no problem**

- No need for good natural light. *PGS SUPERGREEN* looks great anywhere, all the time.

#### **“Pitch” marks**

- *PGS SUPERGREEN* accepts the impact of a golf ball without damage to the surface.

#### **Minimal maintenance**

- No fertilising, seeding, aerating, spraying, mowing or watering. Just brush occasionally and top up special green filler when necessary.

#### **All year round play**

- Withstands all weather – play every day.
