

A simple system for hygienic, odourless drains

PRODUCT OVERVIEW

DrainFresh from Watersave is a patented new generation floor waste that provides 24 hour hygienic protection against toxic odours, harmful bacteria and pests, from entering your building via the drains. DrainFresh is suitable for both domestic and commercial buildings

With a chrome plated brass or a stainless steel grate, the **DrainFresh** system incorporates a cleverly designed trap which creates a water seal preventing drain odours from entering the room. A unique air admittance valve prevents the water seal from being sucked away by changes in air pressure within the drain system below

The **DrainFresh** body is infused with Ultra-Fresh antimicrobial protection. The Ultra-Fresh technology harnesses the natural antimicrobial power of silver to provide a lasting hygienic effect and provide effective control over a vast range of bacteria including E coli, Salmonella, MRSA, Pseudomonas, V.R.E and Golden Staph

BENEFITS

Stops drain odours: The DrainFresh barrier technology prevents drain odours from entering the room through the floor waste

Protects against harmful bacteria: DrainFresh is infused with Ultra-Fresh performance antimicrobial, providing effective control over bacteria such as E coli, Salmonella, MRSA, Pseudomonas, V.R.E and Golden Staph

Prevents foaming: The DrainFresh design ensures foaming suds do not enter the room or laundry via the floor waste

Unique air admittance valve (AAV): DrainFresh incorporates a unique air admittance valve that eliminates potential problems that may result from pressure differentiation beneath the drain and ensures the plumbing system keeps working at peak performance

Protection from pests: The DrainFresh design blocks the entry of pests such as cockroaches and other vermin

Chemical free: No need for any chemical cleansers or deodorisers for drains

Simple to install: DrainFresh can be installed by the home owner or building owner - just remove the existing grate and insert the DrainFresh

Retrofit or new construction: DrainFresh is suitable in all areas where a floor waste is located and is ideal for hotels, restaurants, schools, hospitals, aged care, private homes, airports, commercial buildings, and public amenities

AWARD WINNING AUSTRALIAN DESIGN

DrainFresh has been awarded the 2009 Innovative Product of the Year by the GreenPlumbers, Master Plumbers and Mechanical Services Association of Australia (MPMSAA). DrainFresh is designed and manufactured in Australia.

DRAINFRESH PRODUCT CODES

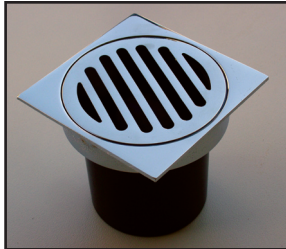

DFR100-S **Stainless**
DFR100 **Chrome**

DrainFresh 100mm Drop in Grate

- Patented trap prevents drain odours
- Unique air-admittance valve
- Protected with Ultra-Fresh Antimicrobial Protection
- Resists growth of bacteria
- Prevents foaming
- Blocks the entry of pests
- Chrome plated brass or stainless steel grate
- 100mm diameter
- Ideal for retro fit

DFSS100-S **Stainless**
DFSS100 **Chrome**

DrainFresh 100mm Grate with Square Surround

- Patented trap prevents drain odours
- Unique air-admittance valve
- Protected with Ultra-Fresh Antimicrobial Protection
- Resists growth of bacteria
- Prevents foaming
- Blocks the entry of pests
- Chrome plated brass or stainless steel grate
- 100mm diameter with square surround
- Ideal for new installations

DFRS100-S **Stainless**
DFRS100 **Chrome**

DrainFresh 100mm Grate with Round Surround

- Patented trap prevents drain odours
- Unique air-admittance valve
- Protected with Ultra-Fresh Antimicrobial Protection
- Resists growth of bacteria
- Prevents foaming
- Blocks the entry of pests
- Chrome plated brass or stainless steel grate
- 100mm diameter with round surround
- Ideal for new installations
