

Tudor

Zip Industries

Zip Tudor is available in 5 or 10 litres capacity and stores ready-to-use hot water right at the point of use. The Zip Tudor delivers water at the desired temperature of 35 -80 degrees with frost protection and features a low watt density spiral heating element for rapid recovery. A neon light indicates when heating element is "on".

The open outlet single point system has overload protection with a safety cut-out which disconnects the heater from the power in the event of thermostat failure.

Installation

The Zip Tudor should be installed only by a qualified tradesman and in accordance with manufactures instructions.

The Zip Tudor supplies hot water to a single outlet and connects directly to the cold water supply. No relief valve to be plumbed away. No safe tray needed for 5 litre models.

Warranty

Unpressurized open-outlet storage tank moulded from approved corrosion-proof polypropelene. Insulation will last the life of the heater. The Zip Tudor has a twelve-month warranty.

About Zip Industries

Zip Heaters started life over sixty years ago as a manufacturer of water heaters.

In 1975 the company invented the concept of an instant boiling water heater to replace kettles and urns. This led to the development of instant boiling water as we know it today.

Millions of people world-wide now use a Zip instant boiling water unit daily at work for making hot beverages and for cooking. It is so convenient, time saving and cost effective.

Zip systems dispense boiling water instantly so there is no more waiting for the kettle to boil. Moreover, patented technology means that Zip instant boiling water heaters are much more energy efficient than kettles or hot water urns.

Today Zip is the world leader for instant boiling water at work and at home.
