

Water Restrictions for Cities and Towns across Victoria

Stage 4

Stage 4 Water Restrictions

Lawns and gardens

Lawns and gardens cannot be watered at any time.

Vehicle washing

A vehicle may only be washed for health and safety reasons. A bucket filled from a tap can be used to clean windows, mirrors and lights; and spot-remove corrosive substances. This also applies to commercial car washes.

Pools and spas

New pools or spa of any size capacity cannot be filled with drinking water. However, a new or existing swimming pool or spa maybe filled with an alternative source of water such as groundwater.

An existing pool or spa of less than 2,000 litres capacity may be filled by means of a watering can or bucket filled directly from a tap (and not by means of a hand-held hose).

An existing pool or spa of greater than 2,000 litres must not be filled except in accordance with a water conservation plan (contact you local water business for more information).

An existing pool or spa must not be topped up except by means of a watering can or bucket, filled directly from a tap (not by means of a hose).
